U.S. 166B bridge survey planned

Starting the week of Oct. 1 and continuing for six weeks, the Kansas Department of Transportation (KDOT) will conduct a field survey for a bridge replacement over Deer Creek on U.S. 166B at Sedan. The survey will gather information necessary for the detailed design of the proposed improvement.

The length of the survey area is approximately 1,000 feet on the existing highway alignment. Activities include the use of survey instruments on the ground to determine locations of existing features within the survey corridor. A member of the survey crew will contact property owners and/or tenants for permission to enter private property. Kara LaRiviere is the survey manager for KDOT. Persons with questions may contact KDOT Public Affairs Manager Priscilla Petersen at (620) 902-6433.
