Survey taking place at U.S. 75 bridge north of Caney

The Kansas Department of Transportation (KDOT) has started a field survey at the U.S. 75 bridge over Cheyenne Creek, located one mile north of the south U.S. 166/U.S. 75 junction at Caney.

The length of the survey is 2,000 feet on the existing highway alignment. Survey crew members are gathering information for the detailed design of a proposed bridge replacement project.

KDOT expects the survey to be complete by Jan. 15, 2021. Activities include the use of survey instruments on the ground to determine locations of existing features within the corridor.

A member of the survey crew will contact property owners or tenants for permission to enter private property. John Sommers of JEO is in charge of this survey for KDOT. Persons with questions may contact KDOT Public Affairs Manager Priscilla Petersen, (620) 902-6433.
