KDOT to begin field survey for bridge replacement on K-31

Starting Monday, Nov. 24 and continuing for six weeks, weather permitting, the Kansas Department of Transportation (KDOT) will conduct a field survey at the North Fork Little Osage Drainage Bridge on K-31 in Anderson County. The bridge is 2.09 miles east of the U.S. 59/K-31 junction. The approximate length of the survey will be 2,900 feet at the bridge site.

The survey is taking place to gather information necessary for a detailed design of a proposed project to replace the bridge. Activities will include the use of survey instruments on the ground to determine locations of existing features within the corridor. A member of the survey crew will first contact property owners and/or tenants for permission to enter private property. Martin Long with the consultant firm of Coder Engineering is in charge of the survey.

For more information contact Southeast District Public Affairs Manager Priscilla Petersen at 1-877-550-5368 (toll free).
