US-36 Mill & Overlay Project in Republic County

Beginning, Wednesday, March 12, 2014, road work will be underway on US-36 in western Republic County. The Mill and Overlay project starts at the Jewell/Republic county line then east to the US-36/US-81 Interchange. Work will include milling of the highways surface material followed by a heavy asphalt overlay including the highway shoulders. In addition to the overlay left turn lanes in both directions will be added at US-36/70th St (1.5 miles west of Scandia).

Traffic will be controlled by flaggers and pilot car at a reduced speed. This work zone shall be in effect during daylight hours only. Plans call for the project to be completed in December of 2013 weather permitting.

The purpose of the project is to extend the life of the highway while improving ride quality and functionality.
