Pavement replacement in Strong City

The Kansas Department of Transportation has begun work to replace concrete pavement on U.S. 50 in Strong City.

Concrete work on U.S. 50 will begin just west of the west Strong City limits to just east of the east Strong City limits.

During construction, traffic will be reduced to one lane in each direction with a 12-foot width restriction. On occasion, motorists may be required to stop for short periods of time. Be prepared for delays and allow extra time in your travel schedule.

Vogts-Parga Construction LLC. of Newton is the prime contractor for this \$1.8 million project, which is scheduled for completion by December, weather permitting.

KDOT urges all motorists to be alert and obey the warning signs when approaching and driving through a highway work zone. To stay aware of all road construction projects across Kansas, go to www.kandrive.org or call 5-1-1.
