KDOT making interim improvements on SLT's K-10 at 27th Street

On Sept. 11, the Kansas Department of Transportation implemented one of many interim improvements to address safety on the South Lawrence Trafficway (SLT) corridor while the Supplemental Environmental Impact Statement study continues to progress for the future freeway improvements.

KDOT installed a queue warning system in advance of the K-10/27th Street intersection, informing travelers of the presence of slow or stopped traffic using dynamic message signs. Travelers can anticipate advanced warning messages on three eastbound signs and four westbound signs.

The signs will notify travelers to slow down to help reduce queuing-related collisions. KDOT urges all motorists to be alert and obey the warning signs when approaching and driving through this intersection.

To stay aware of all road construction projects across Kansas go to www.kandrive.org or call 5-1-1.

For more information, please contact: Garry Olson, Traffic Engineer with the Bureau of Transportation Safety and Technology, 785-368-7297.
