Survey for proposed bridge replacement begins in Marshall County

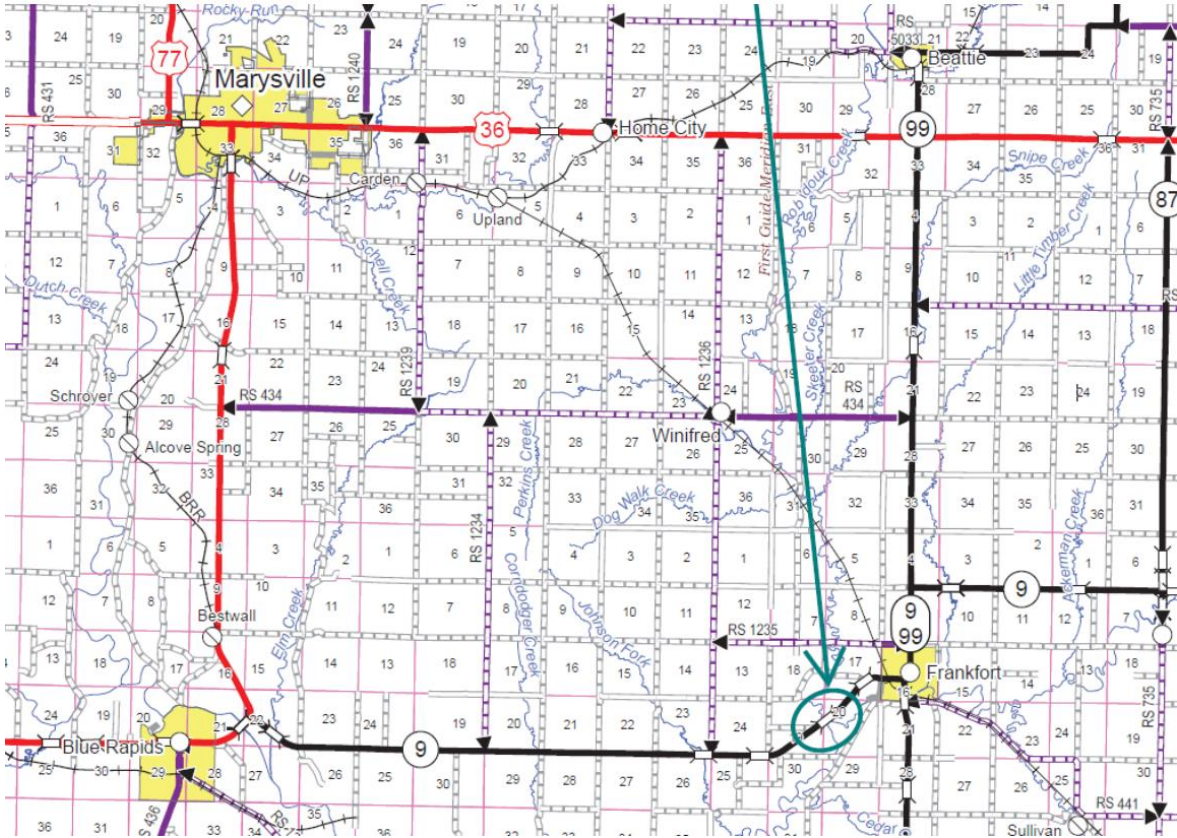

The Kansas Department of Transportation (KDOT) has begun a field survey for a proposed bridge replacement of the Robidoux Creek Bridge located on K-9, approximately 10.5 miles east of the K-9/U.S. 77 junction in Marshall County.

The survey is to gather information that is necessary for the detailed design of the proposed improvement and is estimated to be completed by June 1, 2021.

John Summers, P.S., Survey Project Manager, JEO, will oversee this survey for KDOT.

A member of the survey crew first will contact property owners and/or tenants for permission to enter private property. Survey activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.

The map below shows the project location.
