## **Polk Quincy Viaduct lane reduction begins Monday**

The right lane of westbound I-70 will be closed on the Polk Quincy Viaduct in Topeka for emergency deck patching repairs beginning Monday, Aug. 23, according to the Kansas Department of Transportation.

The I-70 closure, from mile marker 361 to 362, will begin at approximately 9 a.m. Monday morning and will remain in place until the project is completed in mid-September, weather permitting. The S.E. 2<sup>nd</sup> Street/S.E. Madison Street on ramp will also be closed during this time.

Work will take place Monday through Saturday, during daylight hours. According to KDOT, the speed limit will be reduced to 50 mph through the work zone, which will be marked by barricades, arrow boards, signs and cones. Drivers should be prepared for slow-moving traffic through the area and use extra caution.

Wildcat Concrete Services, Inc., of Topeka is the contractor on the \$240,000 project.

KDOT urges all motorists to be alert and obey the warning signs when approaching and driving through a highway work zone. To stay aware of all road construction projects across Kansas, go to [www.kandrive.org](http://www.kandrive.org) or call 5-1-1.
