## Projects Administered by KDOT

## **PROJECTS ADMINISTERED BY KDOT**

This section provides information about the projects the Kansas Department of Transportation (KDOT) will administer for the period October 1, 2016 through September 30, 2020. These projects are contained within the four appendixes that follow. The appendixes are Appendix A- State Transportation **Improvement Program Interim Project** Index; Appendix B- State Transportation Improvement Program FFY 2017-2020 Project Index; Appendix C- Summary of State Transportation Improvement Program Appendixes A & B Estimated Obligation; and Appendix D- State Transportation Improvement Program Advance Construction Project Index.

Appendix A is a list of interim FFY 2016 projects with a work phase(s) anticipated to obligate during the preparation and comment period of the new FFY 2017-2020 STIP. The index is in county, then project number order. Appendix B lists all projects with at least one work phase anticipated to obligate for the first time within the FFY 2017-2020 STIP. The projects are indexed by county and then project number order. Both appendixes provide general project information including project number, work type, county, route, project length, letting type, NHS status, description, location and scope. Additionally, project funding information including identification of project work phase(s), work

phase(s) year of anticipated obligation, total work phase(s) cost estimate and total project estimated cost is provided. (The total estimated project cost includes all work phase(s) even those that are not within the period of the current STIP. For this reason, the individual work phase totals listed in the STIP may not always sum to the total estimated project cost.) Furthermore, for work phases anticipated to obligate in the STIP FFY 2017-2020 or for interim projects in FFY 2016, funding sources are identified along with the participation anticipated from each source.

Appendix C provides a summary of total anticipated obligation <u>federal</u> (including the anticipated obligation totals for projects anticipated to be obligated for AC), <u>state and local</u> by federal fiscal year and by work phase for the four STIP years FFY 2017-2020 and for the Interim year FFY 2016. However, Appendix C does <u>not</u> include projects within the MPO areas. The summary is strictly of those projects administered by KDOT and listed in Appendixes A & B.

Listed in Appendix D are estimated conversion amounts for <u>all</u> projects designated as advance construction (AC) including projects within MPO boundaries. Projects are arranged by county and project number order. General project information is provided including the route, project description, project work type, the year(s) of expected conversion, the anticipated conversion amount for each year of conversion and the total anticipated conversion amount for each project. Conversions projected to occur after the four years of the STIP are grouped together in a single column titled "After 2020 Planned Conversion". A sum of total conversions by year for each of the four STIP years and for the Planned Conversion after 2020 is provided. Additionally, a total planned conversion amount that includes all years is provided.

All projects designated with AC are done so with federal approval and have been initiated in advance of federal fund authorization for that specific project. All costs incurred on the project while designated as an AC project are the responsibility of the initiating entity (State/Local/Other). In the future when federal aid apportionment and obligation authority becomes available, the AC funded projects are "converted" to federal funds and reimbursement is requested.

The Project Indexes (Appendixes A & B) and the Advance Construction Project Index, Appendix D, may have overlapping projects. This occurs when a project has an estimated obligation within the STIP period in one work phase and has an expected advance construction conversion in a different work phase, which results in the project appearing in Appendix A and/or B and Appendix D. Likewise, it is possible for a project to appear in Appendix D and not be in Appendix A and/or Appendix B. In this scenario, all project work phase obligations have occurred in prior years or are scheduled for future years – not in the STIP period and are not being reported in the STIP, while the work phase(s) using advance construction has yet to convert.

The information in Appendixes A, B, C & D is not the same as the information provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. The information in the Estimated Obligation table includes estimated obligations for projects in MPO areas and the estimated obligations are for federally projected obligations only. The information in Appendixes A, B & C is for KDOT administered projects only -projects in MPO areas are not included and Appendix C-the Summary of Obligations are for all obligations anticipated state, local and federal- not just federal as is provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. Additionally, the Appendix C Summary totals for each year include AC projected to obligate. However, the projected obligation of AC is not included in the Estimated Obligations for KDOT, Local, Metro table in the Program Financing section. These differences preclude the summing of Appendix C Summary totals by year and Appendix D-Total Anticipated AC conversion by year to arrive at the total federal obligation for a year as provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section.

The project indexes include the following project related information – Appendix D information is identified by an (\*); Appendix A & B provide all items listed below except for Planned Conversion and Total Planned Conversion which are in Appendix D only.:

- <u>County\*</u> identifies county where work occurs
- <u>Fund Category Code</u> how the project is funded; one line is *shown for each type of funding* used on a project
- <u>Letting Type</u> identifies whether a project is being let or not and if let who is letting the project
- NHS Project indicates whether project is on the National Highway System
- <u>Planned Conversion\*</u> anticipated dollar amount to be converted to federal funds through the conversion of AC project
- Project Length in miles
- <u>Project Location</u> brief description of where the project is
- <u>Project Name</u>\* –general description of the project
- <u>Project Number\*</u> -KDOT number used to track individual project work
- <u>Project Scope</u> –general description of the work being performed
- <u>Route\*</u> identifies route on which work occurs
- <u>Work Phase</u> identifies the phase of work being performed
- Work Phase Estimate the estimated cost to complete the phase of work.
- <u>Work Phase Estimated Obligation Amount</u> expected dollar amount to be obligated for the work phase by fund category.
- <u>Work Phase Fund Prorata</u> the percentage of the funds for the work phase being contributed by the fund category
- <u>Work Phase Obligation FFY</u> the federal fiscal year in which the work phase is anticipated to be obligated

- <u>Work Type\*</u> the type of work to be accomplished during the project
- <u>Total Planned Conversion\*</u> sum of all anticipated advance construction conversions for a project.

Listed below are definitions for the <u>work type</u> acronyms used in the project indexes (Appendixes A, B & D).

## HOW TO READ THE STIP PROJECT APPENDIXES A & B

The project appendixes A & B list projects anticipated to obligate in the State of Kansas during the STIP years. Appendix A is an index of interim projects from the prior federal fiscal year that are projected to obligate during the new STIP's comment period. Appendix B is an index of projects in the current federal fiscal year plus three subsequent federal fiscal years anticipated to have a work phase(s) obligate. Both indexes show all expected obligations- federal, state, local and other. Below is a diagram that identifies the fields provided for the projects listed in the appendixes.
