How to read the STIP Amendments

STIP amendment information provides all the same general information and has the same format as the STIP project lists (Appendix A & B) with one addition- the disposition. The disposition information is provided to explain the change or changes being made to the project. Following this diagram is a list of the change disposition abbreviations used in amendments with a brief description of each. Amendments to the STIP document significant changes to a project that require concurrence in the change from FHWA and/or FTA. Examples of these changes are the addition or deletion of a project, a major change in project cost, change in project/project phase initiation dates, a major change in design concept or design scope, and changes in funding. Additionally, to meet FHWA guidelines an amendment requires public review and comment and a re-demonstration of fiscal constraint. Below is a diagram that identifies the fields provided for projects listed in amendments.
