## **Survey to begin for U.S. 54 pavement replacement in Kingman County**

Starting around Jan. 4, a field survey will start in Kingman County for design of proposed pavement replacement of U.S. 54 and interchange ramps.

The proposed improvement would be from the U.S. 54/K-14 east junction east to the Kingman/Sedgwick county line. The approximate length of the survey, which will be based on existing alignment, is 7.1 miles.

The survey is estimated to be completed by May 15.

The survey will be contained within existing right of way, and the consultant will contact property owners and/or tenants for permission to enter private property upon entry. Survey activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.

Doug Roeder, P.S., Survey Project Manager, Wilson & Co., will be in charge of this survey for the Kansas Department of Transportation.

**The red arrow on the map below shows the project location.**
