Current Road Conditions

Currently roadway conditions across Northeast Kansas are mostly to completely snowpacked **with some drifting now occurring** throughout the region. *See the chart below for current roadway conditions for individual Northeast Kansas counties.* Road conditions are not expected to improve much over the next 24 hours due to the ongoing falling and blowing snow. **KDOT daytime crews will plow continuously and treat as needed. The blowing and drifting snow will continue to challenge crews in trying to keep the roadways clear and free of snow.**

We strongly encourage drivers to Stay Home, Stay Warm, Stay Safe today! If drivers must get out, they should allow extra time for their daily commute and should drive for the conditions on the roadways they are travelling on. Roadways may be SLICK in spots due to the snowpacked conditions, so drivers need to use caution and take it slow as they travel about today.

Driver Safety Tips

Please remind DRIVERS as they travel about to:

1. Take it SLOW!
2. Allow plenty of extra drive time.
3. Watch for icy/slick spots on the roadway; don't assume that if the pavement looks clear, that it is.
4. Buckle up every passenger, every time.
5. If they get stranded, to stay IN their vehicle and call *47 on a state highway/interstate route (any highway that begins with I-, K-, and US-), *KTA on the Kansas Turnpike, or #911 at anytime.

For travel during winter storms, drivers should use caution, allow plenty of driving time, buckle up (every passenger, every time) and be sure to turn on their headlights, and turn off their cruise control. Drivers should also provide for a safe distance or cushion between themselves and vehicles ahead of them.

We also want to remind drivers to stay a safe distance back from KDOT snow plows, and if drivers should pass the snow plows, to be extra careful and allow plenty of room as the trucks do travel slower than surrounding traffic.
