### **Current Road Conditions – UPDATED!**

**Road conditions currently vary from normal seasonal (Douglas/Johnson Counties only) to wet/slush to spots to completely snowpacked throughout the remaining Northeast Kansas counties. Where snow has accumulated on the roadways (including Topeka/Lawrence and most of Kansas City Metro Areas), crews are plowing all areas and treating (salt or salt/sand mixture) on bridges/overpasses/ramp areas as needed. Roadways may be slick where the new snow is accumulating on the roadways. See the chart below for current roadway conditions for individual northeast Kansas counties.**

**Air and pavement temperatures are hovering at or above the freezing mark which is helping to keep the roadways from becoming icy. Highways, including mainline/passing lanes, ramp areas, bridges and overpasses, may be slick due to the snowpacked conditions in those counties affected by the new snowfall. Drivers need to use caution, take it slow and allow for extra time during the early morning commute.**

## Driver Safety Tips

Please remind DRIVERS as they travel about to:

1. Take it SLOW!
2. Allow plenty of extra drive time.
3. Watch for icy/slick spots on the roadway; don't assume that if the pavement looks clear, that it is.
4. Buckle up every passenger, every time.
5. If they get stranded, to stay IN their vehicle and call \*47 on a state highway/interstate route (any highway that begins with I-, K-, and US-), \*KTA on the Kansas Turnpike, or #911 at anytime.

*For travel during this winter storm, drivers should use caution, allow plenty of driving time, buckle up (every passenger, every time) and be sure to turn on their headlights, and turn off their cruise control. Drivers should also provide for a safe distance or cushion between themselves and vehicles ahead of them.*

*We also want to remind drivers to stay a safe distance back from KDOT snow plows, and if drivers should pass the snow plows, to be extra careful and allow plenty of room as the trucks do travel slower than surrounding traffic.*
