Southbound U.S. 69 to 151st Street exit ramp will close July 6

The Kansas Department of Transportation has announced the southbound U.S. 69 to 151st Street exit ramp will be closed to traffic starting Thursday, July 6, at 8 p.m. and remain closed for approximately one month.

This temporary ramp closure is necessary to allow safe access for grading and paving work.

A detour will be marked guiding traffic south to exit at the U.S. 69/159th Street interchange and then east to travel north on Metcalf Avenue, or west to travel north on Antioch Road, to 151st Street.

Construction schedules are subject to change. Current U.S. 69 corridor construction and closure information is available on the 69Express project website, www.69express.org. For additional project details, members of the public can access regular construction updates on the 69Express Facebook and Twitter pages, by subscribing to the project newsletter and signing up for mobile phone text alerts.

Map below shows closure location marked in red and detour routes marked in blue.
