

APPENDIX

to the

KANSAS DEPARTMENT OF TRANSPORTATION'S

2017 Annual Report

This appendix contains additional transportation information including:

- Financial Compliance
- Project Selection Criteria
- Project list detailing projects currently scheduled for improvement, projects completed in FY 2016 and projects under construction. Also list of aviation, rail and public transit projects.
- Transportation Revolving Fund
- Modal Information
- Federal Fund Exchange Program

Section A

Financial Compliance

Each year, the Department provides financial information to the Governor and Legislature. This information includes both a summary of financial information and a statement of assurance that a Comprehensive Annual Financial Report (CAFR) of all funds for the preceding year has been prepared. The financial report must include a report by independent public accountants attesting that the financial statements present fairly the financial position of the Department in conformity with generally accepted accounting principles (GAAP).

The Department has prepared a CAFR for Fiscal Year (FY) 2016. A report of the independent public accountants,

CliftonLarsonAllen, LLP, is included in the CAFR after audit completion. Also included in the CAFR is a certificate of achievement awarded to the Department for excellence in financial reporting for the FY 2015 CAFR. This award marks the 28th consecutive year that the Department has received the award.

The complete CAFR is available by contacting the Department's Office of Public Affairs at 785-296-3585 (Voice)/(TTY). The FY 2016 CAFR will also be available under the KDOT Financial Disclosures section of the Department's website at <http://www.ksdot.org/bureaus/burFiscal/default.asp>.

FY 2016 FINANCIAL INFORMATION

The following schedule is a summary of revenues and expenditures for all funds for FY 2016. All amounts are in thousands.

	2016	Percent of Total
REVENUES		
Motor Fuel Taxes	\$ 448,904	29 %
Vehicle Registrations and Permits	214,428	14
Intergovernmental	350,731	23
Sales and Use Taxes	519,239	33
Investment Earnings	3,985	0
Other	11,823	1
Transfers from		
Other State Funds	4,563	0
Total revenues	1,553,673	100 %

EXPENDITURES

Current Operating		
Maintenance	117,789	6 %
Preservation	329,371	17
Modernization	38,145	2

	2016	Percent of Total
Expansion and enhancement	369,812	19 %
Communications system	4,173	0
Local Support	340,144	17
Rail, Air and Public Trans. Administration and transportation planning	19,809	1
53,874	53,874	3
Debt Service		
Principal	102,670	5
Interest and fees	79,167	4
Transfers to Other		
State Funds	528,535	26
Total expenditures	1,983,489	100 %
<u>OTHER SOURCES (uses)</u>		
Revenue Bond Proceeds	590,875	121 %
Premium on Issuance of Debt	122,880	25
Payment to Refunded Bonds Escrow Agent	(223,778)	(46)
Total other	489,977	100 %
Excess (Deficiency) of Revenues and Other Sources Over Expenditures	60,161	100 %

Project Selection Criteria

In May 2010, the Kansas Legislature passed the transportation program, Transportation Works for Kansas (T-WORKS) that covers a 10- year period from FY 2011 through FY 2020. Under the direction of T-WORKS, KDOT developed a more strategic approach to highway project selection. In the previous program, the Comprehensive Transportation Program (CTP), project selection was based solely on engineering factors. However, in T-WORKS, while engineering factors are still used to select projects, they have been augmented with economic impact evaluation and/or local input whenever practical. Additionally, to achieve greater programming flexibility, rather than selecting all projects at the start of the program as was done in past transportation programs, under T-WORKS many projects are being selected on a rolling 2- year basis. Extending project selections over the life of T-WORKS has increased KDOT's ability to respond to changes in roadway conditions and economic opportunities as they arise. By implementing these changes, the project selection process provides greater stakeholder input, more flexibility in projects selected and an increased ability to respond to the prevailing economic conditions.

Under T-WORKS construction projects are categorized into four core programs: Preservation, Modernization, Expansion and Local Construction. The four core programs group construction projects with similar work types and scopes together. Projects within each of these major programs are further grouped together based upon similar funding sources or project-types into more specific groups or subcategories. In the new project selection process, each of the core programs have evaluation criteria that are used for making project selections.

For the Preservation program, engineering factors are an effective evaluation method for project selection and remain the sole factor used for selecting projects in this program. However, in the Modernization and Expansion programs, engineering factors are augmented with other factors. In the Modernization program, project selection combines historically strong engineering-based formu-

las with regional priorities and in the Expansion program, project selections combine engineering factors with regional priorities and economic impacts. In each of the programs, proposed projects are scored and ranked based upon how well the proposed projects address the relevant evaluation criteria. Then, selections are made based upon the combined information. The addition of these new factors helps ensure that a project is not only a sound engineering project but is also a project that aligns with the goals and priorities of a region and in the case of expansion projects provides economic benefits. Project selection for the fourth core program, Local Construction, remains unchanged and is determined at the local level by local entities throughout the state with the coordination of KDOT's Bureau of Local Projects.

Engineering factors for the preservation, modernization and expansion programs are evaluated using the engineering based formulas KDOT already has established. Regional priorities are determined through local-consult meetings held throughout the state on a biennial basis. Under T-WORKS, KDOT has conducted local consult meetings in the fall of 2010, 2012 and 2014. The next consult meetings are anticipated to occur in late 2017. Through these meetings and through the continued interaction between the area and district engineers with local entities, KDOT maintains a dialogue with stakeholders throughout the state concerning regional focus and priorities. The third factor, economic impact is assessed by the agency through the computer modeling package-Transportation Economic Development Impact System (TREDIS). TREDIS estimates the potential increases in jobs, income and economic output for a region resulting from a specific transportation improvement.

The chart on the following page illustrates the selection criteria applied to T-WORKS projects in each of the four core programs and the weight given to each criterion.

The Preservation program protects the public's investment in its highway system by maintaining the "as built" condition of roads and bridges. Projects in this group are varied and range from roadway surfacing rehabilitations and bridge repairs to pavement and bridge

T-WORKS Project Selection Criteria

Program	Engineering Factors	Regional Priorities	Economic Impact	Other
Preservation	100%			
Modernization	80%	20%		
Expansion	50%	25%	25%	
Local Construction				100%

replacements.

The engineering factors used when selecting preservation projects relate to the pavement and bridge conditions, like remaining pavement life, rutting, and cracking for roads and joint or bridge deck condition and/or load ratings for bridges. Roads and bridges are evaluated on an annual basis and projects are selected each year based upon this review. Additionally, within the preservation program, are smaller scale set-aside projects that address such issues as signing, pavement markings and railroad crossing surfaces. These set-aside projects are so named because the funds to perform the work is “set aside” or reserved specifically for the type of work designated by the set-aside category. The set-aside group of projects is selected on an annual basis like the other preservation projects. Since projects in the Preservation program are selected annually and the work involved rarely requires more than one season to complete, the majority of the preservation projects listed in this report is for work to be performed in fiscal year 2017. Selecting and programming projects in the Preservation program on an annual basis allows KDOT to maintain flexibility and responsiveness in their project selection process during T-WORKS.

The second core program, Modernization, focuses on improvements to the existing system. Projects under this program are designed to enhance safety and/or improve roadways by adding shoulders, flattening hills, straightening curves and upgrading in-

tersections on already existing roadways. In May 2011, the final selection of the major modernization projects to be completed under T-WORKS was made. These projects were then jointly announced in late May and June 2011 by the Governor and Secretary of Transportation. With the majority of the modernization program already selected, the projects to be undertaken during T-WORKS appear in this report. The scope of the “major” or more complex modernization projects require that selections be made early in the transportation program to ensure that there is sufficient time for the design and construction of the project during the T-WORKS program period. Funding constraints have caused some of the previously programmed Modernization projects for 2017, 2018 and 2019 to be delayed until State Highway Fund revenues improve or new money sources become available to allow their continuation.

Also included within the modernization program are the practical improvement projects which are developed out of the preservation program annual review of roads and bridges and the smaller scale set aside projects. Projects within the practical improvement umbrella are hybrids with elements of both the preservation and the modernization programs. However, the projects have greater complexity and scope than preservation projects making them a better fit for the modernization program. In contrast to other modernization projects, practical improvement projects are not selected in advance but rather are selected on a need basis as determined from the annual review of roads. Project scope pertaining to shoulder improvement is an example of the type of work that is a good candidate for the practical improvement approach. By employing the practical improvement approach, a project may be completed in the most cost-efficient manner feasible. The implementation of this approach enables KDOT to stretch construction dollars and provide the greatest benefit possible for the dollars spent. Projects in the four subcategories of the modernization program that are in the set aside program address issues like corridor development and smaller safety improvements like adding turn lanes and lighting. The set-aside projects like the practical improvement projects are selected on an annual basis. While most of

the modernization funds have been programmed and projects have been selected, a small portion of funding has been reserved to fund the practical improvement projects and set aside projects as they are identified as T-WORKS progresses. In this way, flexibility in scheduling is balanced with the need for early selection of major modernization projects.

The Expansion program, the third principal group under T-WORKS, is intended for projects that expand and enhance the transportation system. Projects in this program concentrate on improving access by adding new lanes or interchanges, reducing commute time and improving air quality by relieving congestion and enhancing economic development in a region by selecting projects with high economic impact. The expansion program, with the exception of the economic development (EDP) and intelligent transportation systems (ITS) set aside, was selected in early FY 2011 and announced by the Governor and Secretary of Transportation in May and June 2011. The expansion projects selected to be completed under T-WORKS appear in this report- including all economic development and intelligent transportation systems projects selected to date. Due to the complex nature of the Expansion program of projects, early selection is crucial to ensure sufficient planning, design and construction time during the T-WORKS program period. Funding constraints have caused some of the previously programmed Expansion projects for 2017, 2018 and 2019 to be delayed until State Highway Fund revenues improve or new money sources become available to allow their continuation

To maintain some flexibility in scheduling in the expansion program, the economic development and intelligent transportation systems projects have been partially selected. The remaining economic development projects will be selected on an ongoing basis throughout T-WORKS as viable projects arise and the intelligent transportation systems projects are selected on an annual basis. In this way, the agency maintains some flexibility to respond to new opportunities as they emerge throughout the remainder of the T-WORKS program.

The fourth program, Local Construction, focuses on improve-

ments to city or county roads. The work encompassed by this program is varied in nature ranging from safety oriented, to maintenance of existing roadway, to small-scale expansion type projects. Regardless of the project focus, the common denominator for all projects is that the work is always on a city or county road. Many of the subcategories within the Local Construction program like the K1R-City Connecting Link Resurfacing (KLINK) program and TEX- Transportation Enhancement program to name only two are partnership programs in which KDOT or the federal government partner with local entities to share the costs and enable local dollars to stretch further. To generate candidate projects, many partnership programs employ a solicitation process in which prospective projects are solicited through an application. The pool of project applications is prioritized based upon program specific criteria. Then, projects are selected in order of priority and programmed until the available funds are expended. The schedule for project solicitation varies but most of the partnership programs solicit projects on an annual basis. In other subcategories within the local construction program, the locals are solely responsible for project selection and development. To assist local entities in their selection process KDOT makes available bridge inspection data, traffic accident data and traffic count data among other resources. In KDOT, the Bureau of Local Projects is the primary point of contact for local construction. Detailed information concerning the local construction program and specifically the partnership programs is located on the T-WORKS website, the link is provided below.

For an in depth look at the entire T-WORKS program including those projects in the core programs, KDOT has established a website that provides information about the all projects selected. This website is a continued effort on KDOT's part to increase transparency and gain greater stakeholder input. To accomplish this goal, the website is not only a source of more information but is interactive with sites throughout that provide opportunities to submit questions, opportunities for participation in discussions and opportunities for comment submission. The T-WORKS website is located at the following link <http://kdotapp.ksdot.org/TWorks/> .

Project Listings

The project listings can be found starting on page B-1.

Transportation Revolving Fund

The Transportation Revolving Fund was a statewide revolving loan fund that provided loans to local units of government for financing road and bridge improvements on and off the State Highway System. Since August 2004, the fund provided 119 executed loans totaling \$141.7 million to 58 cities and counties. KDOT is currently reviewing the status of the TRF program.

Modal Information **Public Transportation**

Public transportation in Kansas is supported by a state program and multiple Federal Transit Administration (FTA) funding programs authorized by the FAST Act. These funding programs, which are augmented by local match, provide the funding for 81 rural general public transit service providers, 64 transit providers that service elderly persons and persons with disabilities throughout the state, and six urban transit properties. Without these programs, many citizens would have no access to public transportation.

The FTA 49 U.S.C. 5311 program provides capital, planning, and operating assistance to states to support rural and small urban (under 50,000 population) transportation projects that serve the general public. For Federal Fiscal Year 2016 the 5311 program for the state of Kansas was funded in the amount of \$11,101,436.

The FTA 49 U.S.C. 5310 program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. Urbanized areas and nonurban areas with populations under 200,000 are eligible for 5310 funds. For Federal Fiscal Year 2016, the 5310 program for the

state of Kansas was funded in the amount of \$2,144,434.

Prior to MAP-21, which preceded the FAST Act; FTA programs 5316 and 5317 were initiated. These programs were the Job Access Reverse Commute program (5316) and the New Freedom (5317) program. These programs have rolled into the 5311 and 5310 programs respectively as identified in MAP-21 and the remaining limited amounts of funds are being appropriately administered.

FTA 49 U.S.C. 5304 provides funding to support cooperative, continuous and comprehensive planning for making transportation investment decisions statewide and in nonmetropolitan areas. For Federal Fiscal Year 2016 the state of Kansas was funded in the amount of \$137,852.

FTA 49 U.S.C. 5339 provides funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. For Federal Fiscal Year 2016, the state of Kansas was funded in the amount of \$1,638,064.

Funding for the state program is available from the Coordinated Public Transportation Assistance Fund. The State Highway Fund provides \$11 million annually for needed transportation services in areas of the state lacking public transit services and to expand, improve and enhance existing services.

Rail Service Improvement Fund

Many areas of the state no longer have service from Class I railroads. Short line railroads provide rail service to such areas, provide an alternative to trucks for freight (primarily grain) shippers, and keep rural areas of the state connected to the national rail network as well as national and international markets for Kansas grains and products. This alternative provides competition and helps keep shipping rates down. It also reduces the number of trucks that would otherwise be on Kansas roads and highways. This in turn avoids increased maintenance and rehabilitation costs for those roads.

The Rail Service Improvement Fund is administered by KDOT's freight and rail unit. The fund makes combination grants and loans available to short line railroads, port authorities operating in Kansas

and shippers and local units of government. The low-interest, long-term (10-year) loans and grants are used primarily for track rehabilitation, capacity improvement and economic development projects. Funds may also be used for financing and acquisition activities and the purchase of rolling stock. The fund receives \$5 million annually.

Kansas Airport Improvement Program

When time is of the essence, no other means of travel can fulfill time-sensitive requirements the way air transportation does. Airports serve an important role in the state transportation system. The foremost role is to support economic activity generated by companies that rely on airports in their daily business. According to the 2010 Kansas Aviation Economic Impact Study, aviation contributes over \$20 million to the Kansas economy each year, the highest per capita impact of any state.

Also important are medical services, both fly-in by professionals as well as emergency evacuations. In addition, agricultural applications, charters, a link to the national air transportation system, private air travel, and many other opportunities are available by virtue of our Kansas system of public-use airports.

The goals of the Kansas Airport Improvement Program (KAIP) include:

- ♦ Maintain the system’s runway condition rating of “very good”;
- ♦ Minimize surface travel time to air ambulance pick-up locations;
- ♦ Improve safety, and;
- ♦ Enhance airport and community economic development appeal.

The program is open to public-use airports in Kansas as defined in K.S.A. 75-5061. Projects under this program are solicited annually to preserve or modernize facilities, to design or plan continued development and to improve or add equipment. A key element of the program is a local matching requirement of between 5 and 50 percent, which is determined by project category. In FY 2015 the program was increased from \$3 million to \$5 million per year as part of the T-Works Transportation Program. This \$5 million per year in state funds, combined with local matching funds, results in \$5.5 to \$6 million in airport improvements per year on average.

Since its inception in FY 2000, the program has supported 508 projects at 115 public-use airports totaling more than \$103 million in airport improvements to the state.

Federal Fund Exchange Program

The federal fund exchange program is a voluntary program that allows a local public agency (LPA) to trade all or a portion of its federal funding allocation in a specific federal fiscal year with KDOT in exchange for state transportation dollars or with another LPA in exchange for their local funds.

Under this program the LPA may develop projects following local procedures, criteria, and standards. All work performed shall be consistent with the Kansas Statutes, applicable regulations, and

normal engineering practices for the work being done. Any work performed on the state highway or city connecting link will require coordination with the local KDOT Area Office.

Only LPAs that are eligible to receive a federal funding allocation may participate in the federal fund exchange program. Eligible LPAs include all counties in the state and cities with populations greater than 5,000 that are not located in a Transportation Management Area (TMA). Currently the only TMAs in Kansas are the Mid America Regional Council (MARC – Kansas City Region) and the Wichita Area Metropolitan Planning Organization (WAMPO).

Participation in the program is optional. An eligible LPA may choose to exchange its federal funds or it may use the funds to develop a federal aid project following the established procedures.

In general, KDOT will annually determine the amount of state funds available for exchange at the time the federal funding is confirmed for a federal fiscal year (FFY). KDOT may conduct more frequent reviews of available funding when necessary as a result of funding or budgetary considerations. Around the beginning of each new FFY, KDOT’s Bureau of Local Projects will notify the LPAs in writing of the amount they are eligible to receive for that FFY.

For more details on this program, see KDOT’s website at www.ksdot.org/burlocalproj/.

PROJECT LISTINGS

Sections B, C, D, E

This section contains the separate project lists.

The remaining projects currently scheduled for improvement in T-Works, projects completed in FY 2016 and projects under construction. All lists are organized by county and route. Each project includes a description, project length, construction cost or estimated construction cost and work type.

K.S.A. Supp. 68-2315, as amended, requires information that includes construction work completed, construction work in progress and planned projects. A detailed explanation of the methods or criteria employed in the selection of projects is also required and may be found in this appendix in section A.

In addition to state highway construction project lists are aviation, rail, and public transit project listings.

NOTE: This section, as well as previous Annual Reports, is available on KDOT's Internet site at www.ksdot.org/publications.asp.

The project lists are:

- *Remaining projects currently scheduled for improvement in T-WORKS, pages B-1 to B-17.*
 - *Projects completed in FY 2016, pages C-1 to C-37.*
 - *Projects under construction, pages D-1 to D-27.*
 - *Aviation, rail and public transit projects, pages E-1 to E-4.*
-

PROGRAM CATEGORIES

The following is a breakdown of the subcategories within each of the Program Categories.

SM Preservation Taking Care of What We Have

1RR Non Interstate Resurfacing (PMS 1R)
BCR Culvert Repair
BSP Bridge Painting
BSR Bridge Repair
CMN Contract Maintenance (PMS)
EMR Emergency Repair
IRP Interstate Basic Impr (old RIM split to Preservation)
ISR Interstate Resurfacing (PMS)
NHP Miscellaneous for Preservation
PBR Bridge Replacement/Rehabilitation
PCR Culvert (to Bridge) Rehabilitation
PDR Bridge Redeck
PMR Pavement Marking
RIP Non Interstate Basic Impr (old RIM split to Preservation)
RRS Railroad Crossing Surfacing
SLR Signing & Lighting Repair and Replacement
SOS Highway Signing
SRR State Route Removal Program

MM Modernization Safety & Shoulder Improvements

1RS Resurfacing w/Improvements (Practical Design)
COR Corridor Management
GFU Guard Fence Upgrades (retired)
GSI General Safety Improvement Projects
IRI Interstate Roadway Geometric Improvements
KCC KCC Railroad Crossing Projects
LTG Highway Lighting
MPR Miscellaneous
OVC Oil Overcharge (retired)

MM Modernization Safety & Shoulder Improvements

RIM Non Interstate Geometric Improvements
SAF Safety Projects (State)
SBW Scenic Byway

SE Expansion/Enhancement Adding Something New

AAR Advanced Acquisition of ROW
EDP Economic Development
IRC Interstate Capacity Improvement (old IRI split to Expansion)
ITS Intelligent Transportation Systems (ITS)
RIC Non Interstate Capacity Improvement
(old RIM split to Expansion)
RSL Local Partnership Railroad Grade Separations
RSP New Railroad Grade Separations (State)
SEB System Enh. – Bypasses (retired)
SEC System Enh. – Corridors (retired)
SEI System Enh. Interchanges/Separations (retired)
SEW System Enh. Wichita Railroad Crossings (retired)

LC Local Construction

HAZ Safety Projects (HSIP, off system)
HES Safety Projects (HSIP, on system)
K1R KLINK Resurfacing
K3R Geometric Improvements for KLINKs
LBT Local Bridge Transfer Program
LOC Local Construction (Local Administered & Let)
RES Local Construction (KDOT Administered & Let)
RRX Railroad Crossing Protection (HSIP, on system)
RXR Railroad Crossing Protection (HSIP, off system)
SRT Safe Routes To Schools (Federal)
TEX Transportation Enhancement Program

REMAINING PROJECTS SCHEDULED FOR IMPROVEMENT IN (remaining FY 2017 - 2020)

County	Route	Location Description	Length (Miles)	Type of Work	Est FY Const. Cost (1,000's)	Prog Cat & Subcat	Fiscal Year
Allen		0.8 MILES NORTH AND 1.0 MILES WEST OF PETROLIA ON 600 STREET	0.2	Bridge Replacement	218	LC-LBT	2017
Allen		CITY OF IOLA	0.5	Pedestrian & Bicycle Paths	160	LC-SRT	2017

Rail Service Improvement Fund

Many areas of the state no longer have service from Class I railroads. Short line railroads provide rail service to such areas, provide an alternative to trucks for freight (primarily grain) shippers, and keep rural areas of the state connected to the national rail network as well as national and international markets for Kansas grains and products. This alternative provides competition and helps keep shipping rates down. It also reduces the number of trucks that would otherwise be on Kansas roads and highways. This in turn avoids increased maintenance and rehabilitation costs for those roads.

The Rail Service Improvement Fund is administered by KDOT's freight and rail unit. The fund makes available to short line railroads and port authorities operating in Kansas, and shippers and local units of government in coordination with the serving railroad, low-interest, long-term (ten-year) loans and grants to be used primarily for track rehabilitation, capacity improvement and economic development projects. Funds may also be used for financing and acquisition activities and the purchase of rolling stock.

Project Number	Rail Line Segment	Grant Amount	Loan Amount	Project Description
28 RF-0045-01	Garden City Western Railway	311,756.68	415,657.57	Scope has expanded to include replacement/upgrade of all 13 switches at Garden City.
63 RF-0048-01	South Kansas and Oklahoma RR	227,290.80	303,054.40	Rerouting on main line and expansion of industry track at Beachner Grain Facility - Independence.
5 RF-0049-01	Kansas and Oklahoma RR	3,000,000.00		Rehabilitation and construction of rail line for the new Great Bend Transload Facility.
28 RF-0050-01	City of Garden City, KS	3,000,000.00		Construction of new rail line into new Garden City Transload Facility.

State/Federal Public Transit Programs - Contracts

FY 2016 Coordinated Transit District (CTD) Operating

Coordinated Transit District (CTD) Operating	Counties Served	Total Operating Costs	Local Share	State Share	Federal Share	Total Vehicle Costs	Local Share	State Share	Federal Share
Urban Corridor Coordinated Transit Council (CTD 1)	Douglas, Johnson, Leavenworth, Wyandotte	\$389,159.43	\$109,498.85	\$103,209.60	\$176,451.00	\$175,488.00	\$35,097.60	\$0.00	\$140,390.40
