

In the first year of construction, the new viaduct will be constructed and I-70 west to MacVicar Ave. will be widened. I-70 traffic will remain open during this year of construction. EB I-70 will be able to access downtown Topeka via 1st St. and 3rd St. exits.

Topeka Blvd. will be reduced to one NB lane and one SB lane, both providing access to WB I-70 only. Through traffic between north Topeka and downtown will be detoured to Kansas Ave.

In the second year, construction will focus on connecting the highway to the newly constructed viaduct. To complete this work, I-70 will be fully closed between Topeka Blvd. and 6th St. for approximately seven months. Access to downtown will remain open via 1st St. for EB I-70; WB I-70 can access via 8th St. and 10th St.

Kansas Ave. will be closed during the second year of construction. Through traffic between north Topeka and downtown will be detoured to Topeka Blvd.
